DETAILED ACTION

Claims 1-9 and 13-16 are pending in the application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, 8, 9 and 13-16, drawn to the compounds, compositions and method of use of the compounds of formula I where X is CH₂; Y is CH₂ and Z is N.

Group II, claim(s) 1-4, 6, 8, 9 and 13-16, drawn to the compounds, compositions and method of use of the compounds of formula I where X is CH₂; Y is N and Z is CH₂.

Group III, claim(s) 1-5, 7, 9 and 13-16, drawn to the compounds, compositions and method of use of the compounds of formula I where X is CO; Y is CH₂; and Z is N.

Group IV, claim(s) 1-4, 6-9 and 13-16, drawn to the compounds, compositions and method of use of the compounds of formula I where X is CO; Y is N; and Z is CH₂.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the compounds of Groups I-IV are directed to structurally dissimilar compounds such that the core of the

structure is simply the presence of two rings of which contain variables, a reference anticipating one invention, would not render obvious the other, for example a compound where X is CH₂; Y is CH₂; and Z is N is different from a compound where X is CO; Y is N; and Z is CH₂; etc.. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required. Each group's compounds are made and used independently of each other and could support separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not consider such diverse structures as functional equivalents of each other. The mere fact that there is a single similarity is not in itself a significant reason to render the whole embodiment obvious.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Tentative election of a single species within the elected group is further required.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
